XCG Colour Series

Whatever
the subject,
whatever the
distance, get
into the detail.

The XCG series from Sony utilises GigE Vision Technology to perfectly fit the needs of demanding applications, such as factory automation, high-end security and intelligent traffic systems. They offer a flexible range of resolutions from VGA to 5Mp via full HD and combine cutting edge sensor technology with a smart, robust design. If speed is of the essence, and small object detection is of paramount importance, choose XCG cameras from Sony and see the bigger picture.
